

Certifications At A Glance

Advanced Fertility Certification

Who it's for:

Clinicians who see **fertility, preconception, IVF or recurrent loss** patients and want deeper diagnostic clarity and structured reasoning.

Primary clinical outcome:

Confidence analysing fertility investigations + creating repeatable, strategic case frameworks.

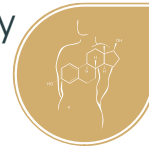

You will learn to:

- Interpret semen, ovarian reserve, immune, endocrine and metabolic markers
- Map cycles using functional and endocrine logic
- Understand system drivers of subfertility
- Support IVF/ART cycles with precision
- Build fertility case plans that are staged, strategic, and evidence-informed

Best suited to:

Fertility-led practices, clinicians wanting confidence, and those expanding into reproductive medicine.

Integrative Gynaecology Certification

Who it's for:

Clinicians treating a **broad range of women's health presentations** and seeking integrated, clear frameworks.

Primary clinical outcome:

Clarity navigating chronic, overlapping gynae conditions using a unified systems approach.

You will learn to:

- Understand endocrine-immune-metabolic-microbiome interactions
- Confidently assess patterns driving gynae symptoms
- Create long-term stabilisation plans
- Reduce diagnostic overwhelm and uncertainty
- Differentiate complex presentations with ease

Best suited to:

Whole-practice women's health clinicians, or those who want deep system-level understanding.

Integrative Obstetrics Certification

Who it's for:

Clinicians already supporting pregnancy and wanting advanced **maternal-foetal** physiological understanding.

Primary clinical outcome:

Confidence in interpreting pregnancy physiology and supporting complex maternal-foetal presentations.

You will learn to:

- Read trimester-specific physiological shifts
- Understand immune, endocrine, cardiometabolic and vascular changes
- Support complex pregnancies within scope
- Use a maternal-foetal systems lens
- Recognise patterns requiring collaborative or escalated care

Best suited to:

Clinicians already engaged with antenatal care or those wanting advanced-level pregnancy support training.

Summary Table

Certification	Best For	Core Outcome	Level	Pathway After
AFC	Fertility caseloads	Diagnostic confidence + fertility frameworks	Intermediate–Advanced	IGC or IOC
IGC	Broad women’s health	Integrated gynae reasoning + clarity	Intermediate	AFC or IOC
IOC	Pregnancy caseloads	Advanced maternal–foetal physiology	Advanced	Optional IGC/AFC
